📅 Report Period: Oct 23rd - 29th

Team Name: GridAI (sdmay23-38)
Senior Design Weekly Status Report; Fall 2022

👥 Members

- Joshua Clinton
- Tanay Parik
- Elvis Kimara
- Rolf Anderson
- Ryan Herren

🗣 Summary of Progress

This week, we made a lightning talk in class and presented our project to other students, plus the professor. We also talked about professional responsibilities in relation to our project.

We accomplished the following last week:
➔ We worked on the Design Context Document.
➔ Met virtually with our client.

⤴ Pending Issues

- ☑ ~~Set up working environment with VM and GCP access~~
- ☐ Make a flowchart of how Virtual Assistant intakes information and interacts with front/backend
- ☐ Make a flowchart of how frontend components interact with DB and what needs to be added/changed to implement ML in the frontend
- ☐ Make fllowcharts of how the whole project works
- ☑ ~~Migrate GCP Environments to our current gitlab <- IMPORTANT~~

✅ Plans for Next week <small>(tag name, by when time)</small>

1. Add more filtering/sorting information to the front end

Contributions <small>(tag name)</small>

1. Joshua Clinton

   ➔ Collaborated on the Proposed Design Document
2. Ryan Herren

   ➔ Collaborated on the Proposed Design Document
3. Tanay Parik

   ➔ Collaborated on the Proposed Design Document
4. Rolf Anderson

   ➔ Collaborated on the Proposed Design Document
5. Elvis kimara
   ➔ Collaborated on the Proposed Design Document
