📅 Report Period: Sept 25th - 1st October

Team Name: GridAI *(sdmay23-38)*
Senior Design Weekly Status Report; Fall 2022

👥 Members

- Joshua Clinton
- Tanay Parik
- Elvis Kimara
- Rolf Anderson
- Ryan Herren

🗣️ Summary of Progress

This week went well. Last week, we met our client in person on Monday and got a good introduction to the many things we'll be working on. This week we met virtually and got acquainted with our gitlab, videos we need, and tasks to complete by next week.

We accomplished the following last week:

➔ Finished team contract
➔ Agreed on when to meet and how frequently we'll see each other in person/online.
➔ Had our first meeting with client
➔ Designated tasks for tackling current project comprehension and presentation

🔀 Pending Issues

☑ ~~Distribute this week's tasks amongst ourselves~~
☐ Watch videos
    ☐ Learn all aspects of project and be ready to present on it next Monday
☐ Designing objectives/goals to accomplish this year

☑ ~~Transfer 22-35 Gitlab Repository to new 23-38 Repository~~
- ☐ get our environment up and running
☐ Access VMs and GCP
☐ Make slides for what team has, and what we'd like to have (@present)

✅ Plans for Next week <small>(tag name, by when time)</small>

1. Finish our team senior design website (Rolf)
2. Set up working environment with VM and GCP access
3. Prepare presentation for current status

📋Notes:

Most work from here until actual design will be in the form of learning where the last iteration of the project left off. We will be evaluating the existing design, presenting the current status of the project, and making goals for our iteration of the project.
